PREFACE

This 1984-1985 edition of the NEBRASKA STATISTICAL HANDBOOK contains a comprehensive collection of data on demographic, social, physical and economic aspects of the State. The data has been gathered from various government (State and Federal) and private sources. The source notes at the end of each table indicate the publication or agency where information was obtained.

For users interested in sources of data on specific subjects, Appendix A, Guide to Data Sources, contains a list of the sources used in each section. Data from sources other than government agencies are subject to copyright restrictions. Permission to use copyrighted material must be obtained directly from the copyright owner.

In compiling this eighth edition, all of the tables contained in the previous edition were carefully reviewed. It was necessary to make changes in some of the tables due to changes in the available data. Terms used in the tables have been taken directly from the sources noted. Definitions of terms not found at the end of the tables can be obtained by referring to the sources.

This volume was compiled and prepared by the Research Division of the Nebraska Department of Economic Development. The statistical series included represent those determined to be most useful. Every effort has been made to insure accuracy in the presentation of these data.

Suggestions or comments from the users of this publication as to the content or presentation are welcome. Please address any comments to:

TABLE OF CONTENTS

SECTION A

AREA AND CLIMATE

Page

Introduction. 3
Land Area of Counties 6
1982 Average Monthly Precipitation by Region. 8
Normal Monthly Precipitation by Region. 9
1982 Average Monthly Temperatures by Region 10
Normal Monthly Temperatures by Region 11

SECTION B

POPULATION

Introduction. 15
Total Population. 17
Net Migration of the Population 17
Population of Counties. 18
Population of Nebraska Towns. 22
Net Migration of the Population by County 30
Population by Age and Sex 33
Population by Age and Color 34
Projected Population by Age 35
Projected Population by County. 36
Population Density. 39
Natural Increase in Population. 42
Births, Deaths, Marriages and Divorces and Rate Per 1,000 Population. 43
Births and Deaths by County 44

SECTION C

LABOR FORCE & EMPLOYMENT

Introduction. 47
Average Employment. 49
Estimated Nonagricultural Wage and Salary Employment by Type. . 50
Detailed Nonagricultural Wage and Salary Employment 52
County Labor Force Summary. 53
Average Hours and Earnings of Manufacturing Production Workers 56
Average Hours and Earnings of Production Workers by Industry. . 56
Consumer Price Index. 57

SECTION D

PERSONAL INCOME & STATE PRODUCT

Page

Introduction. 61
Personal Income by Major Source 63
Personal Income by Detailed Source. 64
County Personal Income. 65
County Personal Income by Major Sources 68
Per Capita Personal Income. 72
Average Annual Rate of Growth in Per Capita Personal Income . . 72
County Per Capita Personal Income 74
Nebraska Gross State Product. 79

SECTION E

AGRICULTURE

Introduction. 83
Farms: Number, Land Area, Average Size, and Value. 85
Number of Farms by Counties 86
Number of Farms by Size of Farms. 89
Persons Employed on Farms 90
Tenure of Farm Operators. 90
Value of Farm Real Estate 91
Land in Farms: Classification of Land Use. 92
Number of Farms Reporting Major Items 93
Total Value of Crop Production. 93
Selected Crop Production 94
Crop Production, by County. 95
Yield Per Acre - Major Crops. 97
Cattle and Calves, Inventory and Production by County 98
Pig Crop by County. 101
Sheep Inventory 103
Index of Agricultural Production. 104
Average Prices Received by Farms for Selected Crops
and Livestock 105
Index of Prices Received by Farmers 106
Realized Income From Farming. 107
Sales of Farm Products. 109
Use of Irrigation and Fertilizers, by County. 112

SECTION F

MANUFACTURING, MINING, AND BUSINESS

Page
Introduction. 119
Two Digit Standard Industrial Code. 120
General Manufacturing Statistics. 121
Manufacturing Establishments by Employment Size and Major Industry Group. 122
Value Added by Selected Manufacturing 123
Manufacturing Statistics for Counties 124
Foreign Exports of Manufacturing Products 126
Mineral Production. 127
Mineral Production by Type. 128
Production and Value of Minerals. 129
Petroleum Production by Counties. 130
Value of Nonfuel Mineral Production, by Counties. 131
Trade and Selected Services 134
Trade and Service Establishments by Employment Size 135
Net Taxable Retail Sales, by County 137
Retail Trade by Establishments and Sales. 141
Retail Trade by County. 142
Wholesale Trade by Establishments and Sales 144
Wholesale Trade by County 145
Selected Services by Establishments and Receipts. 147
Selected Services by County 148
Number of Corporations. 150
Business Failures 150

SECTION G

FINANCE AND INSURANCE

Introduction. 153
Assets and Deposits of Insured Commercial Banks 155
Loans and Investments of Nebraska Commercial Banks. 156
Assets of Savings and Loan Associations 157
Nebraska Business of All Life Insurance Companies 158
Business of Nebraska Life Insurance Companies 159
Nebraska Business of All Property and Liability Companies 160
Business of Nebraska Property and Liability Insurance Companies 161
Business of Fraternal Beneficiary Societies 162
Nebraska Business of Nebraska Assessment Companies. 163

SECTION H

TRANSPORTATION AND COMMUNICATIONS

Page
Introduction. 167
Motor Vehicle Registrations 169
Automobile and Truck Registrations by County. 170
Accidents and Mileage Rates 172
Motor Vehicle Accidents 173
Types of Nebraska Motor Vehicle Traffic Accidents 174
Contributing Circumstances to Traffic Accidents 175
Age Distribution of Drivers Involved in Accidents 176
Miles of Construction on State Highways 177
Municipal and Rural Highway Mileage by County 178
State Highway Mileage, by Surface type 182
Railroads, Abbreviations and Track Mileage. 183
Freight Originating or Terminating in Nebraska by Selected Commodity Groups. 183
Railroad Freight Traffic by Tons Carried, Ton Miles, and Earnings. 184
Railroad Freight Traffic by Tons Carried and Earnings 185
Aircraft, Airmen, Airports, and Air Traffic 186
Telephones in Use 187
Daily Newspaper Circulation 188
Newspapers Other Than Daily with Circulation Over 3,000 189
Television Stations 190
Radio Stations. 191
Cable Television Service. 194

SECTION I

CONSTRUCTION AND HOUSING

Introduction. 199
Value of Construction Contracts 201
New Housing Units Authorized by Building Permits and Public Contracts. 202
Housing Units by Type, Authorized for Construction. 204
Mortgage Lending by Insured Savings and Loan Associations . . . 204
Summary of Selected Housing Characteristics 205
Housing and Plumbing Facilities by Occupancy. 206
Owner Occupied Units by Value 207
Vacant Housing Units. 208
Housing Characteristics by County 209
Principal House Heating Fuel by Occupied Housing Units. 212

SECTION J

EDUCATION

Page
Introduction. 217
General Statistics of Public Schools. 219
General Statistics of Non-Public Schools. 220
Sources of Revenue of Public Schools. 221
Enrollment in Public Schools by Grade 222
Number of High School Graduates 222
Higher Education Institutions 223
Degrees Earned, by Level of Degree. 225
Earned Degrees Conferred by Institution 226
Degrees Earned, by Area of Study and Level. 227
Enrollment in Vocational Education Classes by Type of Program . 229
Enrollment in Vocational Education Programs 230
Expenditures for Vocational Education by Source of Funds. . . . 232

SECTION K

HEALTH AND WELFARE

Introduction. 235
Hospitals and Facilities by County. 237
Active Physicians and Dentists. 238
Leading Causes of Death 240
Total Welfare Expenditures by Source of Funds 241
Public Assistance Payments, by County 242
Income Maintenance by County. 246

SECTION L

GOVERNMENT

Introduction. 251
Aggregate Revenue and Expenditure of State Government 253
Revenue of State Government 254
Expenditure of State Government 255
State and Local Government Revenue by Source and
Expenditure by Function 256
Per Capita Amounts of Selected State Government Finance Items . 257
Property Tax and Nebraska Individual Income Tax by County . . . 260
County Voter Registration by Party. 262
Popular Votes Cast for Presidents 265
Popular Vote Cast for Governor. 266

SECTION M

RECREATION AND TOURISM

Page

Introduction. 271
Park and Recreation Areas 273
State Park and Recreation Area Income 277
Attendance at State Park and Recreation Areas 278
Attendance at Selected Nebraska Attractions 279
Participation in Outdoor Recreation Activities by Nebraskans. . 280

SECTION N

ENERGY

Introduction. 285
Consumption of Energy 287
Energy Consumption by Fuel Type and Consuming Sector. 288
Natural Gas Sales of Utilities and Class of Service 289
Revenues of Gas Utilities & Miles of Utility Gas Main 290
Typical Electric Bills - Industrial, Commercial 291
Typical Electric Bills - Residential. 292
Electric Utilities Serving Nebraska Communities 294
Installed Generating Capacity of Electric Utility Industry. . . 295
Generation of Electricity by Electric Utility Industry. 296
Energy Sales of Electric Utility Industry by Class
of Service. 297
Average Number of Customers of Electric Utility Industry. . . . 298
Revenues of Electric Utility Industry by Class of Service . . . 299
Shipments of Coal in Nebraska 300

APPENDIX A

SECTION A

AREA & CLIMATE

SECTION A

AREA AND CLIMATE

Ranking fifteenth in area out of the fifty states, Nebraska has 76,644 square miles of land and 711 square miles of water. The 93 counties vary in area from the 238 square miles of Sarpy County in the east up to Cherry County's 5,966 square miles in the north central.

The invigorating temperate climate of Nebraska is differentiated from west to east. Normal annual average tempature and preciptation, ranges from 47.6° and 16.6 inches of moisture in the panhandle to 51.9° and 30.3 inches of moisture in the southeast. On average the month of July is the warmest and January the coldest in the State. June and January are respectively on average the wettest and dryest months for the State.

The statistics presented in the following pages cover land area and climate of Nebraska. The U.S. Department of Commerce is the principal source for the data shown.

SECTION B

POPULATION

SECTION B

POPULATION

Nebraska had an estimated population of 1,586,000 persons in 1982. This was about 16,000 more than the 1980 total of 1,569,825, or an increase of 1.0 percent over the two year period. The population growth rate for the 1970s was 5.7 percent, or an increase of 84,492 persons.

From 1980 to 1982, about 6,000 more people left the state than entered. This compares to an out-migration of 12,616 persons between 1970 and 1980 or a 0.8 percent out-migration rate.

During the decade of the 1970s, the state became increasingly urbanized. Almost 63 percent of the state's population or approximately 987,500 people resided in urban communities of 2,500 persons or more in 1980 compared to 1970 when 61.5 percent or about 913,500 people lived in urban communities. Over 72 percent of the inhabitants in 1980 lived in state's 535 incorporated communities ranging in population from 2 to 313,911 people.

Average population density in 1980 for Nebraska was 20.5 persons per square mile, but population density varies markedly within the state. Douglas County, containing the city of Omaha, had a population density over 1,190 persons per square mile, while in contrast a few counties in the western part of the state had less than 2 people per square mile.

The demographic trends occurring nationwide were no less apparent in Nebraska as the average person grew older in the 1970s. The state's median age in 1970 was 27.4 years. By 1980 the median age had risen to 29.7 years. The 65 and over age group composed 13.1 percent of the population in 1980 compared to 12.3 percent of the population ten years earlier. Meanwhile, the 18 and under age group dropped from 34.2 percent of the population in 1970 to 28.5 percent in 1980.

Presented in this section are statistics which review growth, distribution, and characteristics of the Nebraska population. The chief sources of these data are the U.S. Bureau of the Census, and the Nebraska Department of Health, Bureau of Vital Statistics.

SECTION C

LABOR FORCE AND EMPLOYMENT

Nebraska's labor force increased by 16,000 persons from its pre-recession peak in 1978 to 1983. However, total employment was 743,000 in 1983, somewhat less than the 1978 total of 749,000. The unemployment rate in Nebraska was 5.7 percent in 1983. This compared favorably with the national rate of 9.5 percent.

The changing distribution of employment in Nebraska is of particular interest. For example, in 1960, 26 percent of all jobs were on farms, but by 1970 the proportion of agricultural employment had dropped to around 15 percent. In 1983, agricultural employment accounted for 10 percent of total employment, while wage and salary employment accounted for about 80 percent, and all other employment accounted for 10 percent of the total. Within the broad industry groups, wage and salary employment in wholesale-retail trade increased from 155,300 in 1978 to 156,900 in 1983, services employment increased from 108,100 to 125,800, and government employment increased from 128,300 to 132,400.

Presented in this section are statistics dealing with the Nebraska working population. Items covered include an industry breakdown of employment, employment data for counties, and selected data on hours and earnings of manufacturing employees. The source for these data is the Nebraska Department of Labor.

COUNTY LABOR FORCE SUMMARY
(Annual Average)

1983	788,000	743,000	584,000	83,200	75,800	45,000	5.7

---

(1) Data for 1970 and later are based on a Labor Force concept rather than the Work Force used previously, and are not strictly comparable with data for previous years.

(2) Data for 1977 and later are not comparable to prior years because of changes in the method of estimating the labor force.

SECTION D

PERSONAL INCOME & STATE PRODUCT

SECTION D

PERSONAL INCOME & STATE PRODUCT

Nebraska's total personal income was almost $17 million in 1982, a 204 percent increase over 1970 and a 17.9 percent increase over 1980. The major source of personal income in 1982 was wage and salary payments, accounting for 56 percent of the total. Dividends, interest, and rent were the second largest source of income in 1982, comprising roughly 23 percent of total personal income. Transfer payments was the third largest source of income, contributing about 13 percent of the total. Proprietors income was the fourth largest source, with farm and nonfarm proprietors income making up 4.3 percent and 4.4 percent of the total, respectively.

Per capita income in Nebraska grew 184 percent between 1970 and 1982. The Plains States* had a growth of 188 percent in this period, while per capita income in the U.S. grew 181 percent. Nebraska's per capita income in 1982 was $10,641. This was under both the Plains average of $10,768, and the U.S. average of $11,100.

Nebraska's gross state product grew 163.5 percent from 1970 to 1980, and 13.1 percent between 1980 and 1982. The sectors with the greatest rate of output growth from 1980 to 1982 included Farm (28.9 percent), Services (24.2 percent), Finance, Insurance and Real Estate (22.8 percent) and Government (20.0 percent).

Statistical series on personal income presented in this section provide a basis for evaluating economic progress and for reviewing the changing structure of the Nebraska economy. This information includes published data from the Survey of Current Business and unpublished data provided by the U.S. Department of Commerce, Bureau of Economic Analysis, Regional Economics Division.

---

*The Plains Region contains seven states: Minnesota, North Dakota, South Dakota, Iowa, Kansas, Missouri, and Nebraska.

(1) Lincoln SMSA includes Lancaster County; Omaha SMSA includes Douglas and Sarpy Counties, Nebraska and Pottawattamie County, Iowa; Sioux City SMSA includes Dakota County, Nebraska Woodbury County, Iowa.

Note: The sum of the major sources may not equal the total personal income because of a residence adjustment necessary to change labor and proprietors income from a place of work to a place of residence basis.

SECTION E

AGRICULTURE

Agriculture is the backbone of Nebraska's economy. Farm income contributes about four times as much to Nebraska's total personal income as it does to the nation's personal income. Agriculture also contributes to other employment and income in the state. For example, 35 to 40 percent of Nebraska's manufacturing employees are either engaged in processing farm products or in producing farm machinery and equipment; activities which are directly related to agriculture. In addition, a large-portion of trade, services, transportation, and other economic activity is directly or indirectly related to the state's agricultural production.

Evidence of the importance of Nebraska's agricultural sector to both the state and nation is provided by production figures and rankings for 1983. Nebraska ranked first in the production of popcorn, alfalfa meal, and Great Northern beans. Nebraska surpassed Texas in 1983 to rank first in the number of fed cattle and calves marketed (4,580,000 head) and second in commercial cattle slaughter (5,063,200 head). The state ranked second in number of cattle on feed (1,760,000 head in 1983). Third place rankings were received for corn for grain production (475,200,000 bushels) and sorghum for grain production (60,000,000 bushels). The state ranked sixth in winter wheat production (98,900,000 bushels) and ninth in soybean production (59,450,000 bushels).

Cash receipts from farm marketings were $7,086.9 million in 1982. Livestock cash receipts accounted for about 60 percent of the total ($4,232.0 million), while receipts for crops were the remaining 40 percent of the total ($2,855 million). Cash receipts have grown 234 percent from 1970 to 1982. However, farm production expenses increased 254 percent over the same period. The result was net farm income of $647.0 million in 1980.

Statistical series included in this section present important data on trends in the number and size of farms, value and use of land in farms, value of crop production and farm products sold, production and prices of selected crops, index numbers for prices received by farmers, and income from farming. For some of these series, the data are presented by counties. Sources of data were the U.S. Department of Commerce, Bureau of the Census and the Nebraska and U.S. Departments of Agriculture, Crop and Livestock Reporting Service.

---

(1) Prices are based on average of monthly prices beginning: July 1 for wheat, oats, and hay, September 1 for soybeans, and October 1 for corn and sorghum grain. Calendar year average is used for livestock and livestock products.

(2) Baled hay, 1940 to date. Loose hay basis prior to 1940.

SECTION F

MANUFACTURING MINING AND BUSINESS

SECTION F

MANUFACTURING, MINING, AND BUSINESS

Manufacturing employment increased from 1970 to 1982 in Nebraska by 2.5 percent. Although this growth appears minimal, 1982 represents a year in which the entire United States manufacturing sector was experiencing the bottom of a major recession. Nationwide, manufacturing employment showed a decline of 2.7 percent for the same time period. Compared to the 87,283 Nebraska manufacturing employees in 1982, 1979 represented the banner year in Nebraska with 99,233 manufacturing employees.

The most important manufacturing activity in Nebraska is food and kindred products, accounting for about 29.6 percent of all employment in manufacturing in 1982. Value-added in food and kindred products was more than twice as large as any other Nebraska manufacturing sector in 1978. During the 1970s, other sectors also increased their value of output substantially, with value-added in the manufacturing of machinery and chemicals experiencing particularly significant increases.

Foreign exports of Nebraska's manufacturing products totaled $767.5 million in 1980, which was 248 percent of the $309 million recorded for 1976 and 573 percent of the $134 million shipped in 1972. Nearly ten percent of all manufactured goods shipped from Nebraska were bound for foreign parts in 1980. About nine percent of Nebraska's total manufacturing employment during this year was directly related to export sales.

The total value of mineral extraction in Nebraska estimated for 1983 is $282.2 million. The leading mineral product extracted was crude petroleum, which together with natural gas accounted for 67 percent of the total value of Nebraska's mineral production. Sand and gravel accounted for approximately 11 percent of the total mineral extraction value. Overall, the mining industry in Nebraska is quite small, employing about 1,700 persons.

Trade and service employment has increased very rapidly in recent years. From 1970 to 1982 employment in wholesale and retail trade increased by 25 percent to 159,146, and services employment increased by 44 percent to 135,908.

Principal sources for manufacturing, mining, and trade statistics included in this section are reports published by the U.S. Bureau of the Census, the U.S. Bureau of Mines, and the Nebraska Department of Labor.

The two digit Standard Industrial Classification (SIC) codes listed below are used in this section to identify manufacturing industry groups:

Code	Short SIC Title
20	Food and kindred products
21	Tobacco manufactures
22	Textile mill products
23	Apparel and other textile products
24	Lumber and wood products
25	Furniture and fixtures
26	Paper and allied products
27	Printing and publishing
28	Chemicals and allied products
29	Petroleum and coal products
30	Rubber, miscellaneous plastic products
31	Leather and leather products
32	Stone, clay, and glass products
33	Primary metal industries
34	Fabricated metal products
35	Machinery, except electrical
36	Electric and electronic equipment
37	Trasportation equipment
38	Instruments and related products
39	Miscellaneous manufacturing industries

SECTION G

FINANCE AND INSURANCE

SECTION G

FINANCE AND INSURANCE

The number of insured commercial banks in Nebraska dropped from a high of 466 in 1981 to 461 in 1982. But total assets of the banks continued to increase to almost $14 billion in 1982. Demand deposits of insured commercial banks held roughly steady from 1981 to 1982 at $2.9 billion, but time deposits increased by 12.5 percent, to almost $8.6 billion.

The number of savings and loan associations decreased from 24 in 1970 to 7 in 1983. About $275 million in loans by savings and loan associations in Nebraska were outstanding as of June 30, 1983, a 52 percent decline since 1970. Total assets of the Nebraska associations were just over $351 million in 1983, down 47 percent from about $669 million in 1970.

An important sector of the Nebaska economy is the insurance industry. In 1982, the 33 life insurance companies headquartered in Nebaska had $69.7 billion of life insurance in force. The total amount of life insurance in force in the State increased by 212 percent, from $10.9 billion in 1970 to $34.0 billion in 1980.

Life insurance companies doing business in Nebraska received about $329 million in premiums and paid out $207 million in claims in 1980. Premiums of $483 million were received by accident and health companies from Nebraska policyholders, while claims of $377 million were paid. Property and liability insurance companies also had positive premium to loss comparisons in 1982.

Statistics in this section present information about the banking and insurance institutions doing business in the State. The chief sources of the data are the Nebraska Department of Banking, the State Department of Insurance, the Federal Deposit Insurance Corporation, and the U.S. Bureau of the Census.

SECTION H

TRANSPORTATION & COMMUNICATION

There are over 96,000 miles of State and local highways in Nebraska. In 1982, more than 98 percent of the State-maintained highways were paved, compared to 71 percent in 1960. This includes Nebraska's Interstate Highway 80, a 455.3 mile highway, which stretches the length of the State and represents the largest single public investment project ever undertaken in Nebraska.

Nebraska motor vehicle registrations reached 1,445,128 in 1983, a 76 percent increase over 1960. Included in the 1983 total were 821,002 automobiles, 364,796 trucks, 47,712 motorcycles and 212,218 vehicles falling in other classifications. Although the total number of motor vehicle registrations continues at a high level, the total number of accidents peaked at 50,802 in 1978, dropped to 42,449 in 1981, and rose to 48,294 in 1983. Fatal accidents and deaths stood at 221 and 255, respectively, in 1983, while injuries numbered 19,885. The auto accident death rate for 1983 was 2.2 per 100 million vehicle miles traveled.

Five railroad companies provide service in Nebraska, operating over approximately 4,900 miles of main track. These carriers are designated as Class I railroads, receiving more than $1 billion in gross operating revenues in 1981. Between 1960 and 1981, railroad tons carried increased from 51.6 million to 168.5 million--a gain of over 226 percent.

Seventeen daily newspapers as well as 39 weekly, biweekly, and triweekly papers serve the State. Television coverage is provided by 14 commercial stations and a network of 9 educational television stations. In addition, cable television is available in 81 communities in Nebraska. Radio stations serving the Nebraska population include 48 AM and 54 FM commercial stations and 11 FM noncommercial stations.

Presented in this section are statistics dealing with the transportation and communications facilities in the State. Sources for data are the Nebraska Department of Motor Vehicles, the Nebraska Department of Roads, the Nebraska Department of Aeronautics, Nebraska Public Service Commission, N.W. Ayer and Son, Inc., Broadcasting Publications, Inc., the U.S. Bureau of the Census, and the U.S. Department of Transportation.

SECTION I

CONSTRUCTION AND HOUSING

The number of building permits authorizing the construction of residential housing totaled 5,477 (preliminary count) in 1983. This represented a 48.9 percent increase from the industry's 1982 performance which was the lowest level of production since World War II. This rebound in new residential construction was accompanied by an increase in mortgage lending. Mortgage lending in 1983 totaled $625 million--a 113 percent increase from 1982.

In 1980, there were 624,821 housing units in Nebraska, an increase of 109,291 from 1970. The median value of owner-occupied units was $38,000, compared to $12,400 in 1970, and the median rent was $170, compared to $77 in 1970.

Of the approximately 391,000 owner-occupied units in the State, 68 percent were in the urban areas. The median value of homes in the State was $38,000 with the median value of urban homes exceeding that of rural homes by about $7,000. This corresponds to the fact that the rural areas accounted for over 60 percent of the owner-occupied homes valued under $10,000, while 80 percent of the homes valued at $50,000 or more were in the urban areas.

The U.S. Department of Commerce, Bureau of the Census is the source of the data presented in this section. Information about housing in Nebraska was obtained from the 1980 Census of Housing, and data on construction activity was obtained from the Census Bureau publications, Statistical Abstract of the United States and Construction Reports, Series C40. Mortgage lending data came from the Federal Home Loan Bank Board.

SECTION J

EDUCATION

SECTION J

EDUCATION

During the 1960s total enrollment in Nebraska's public schools steadily increased--total enrollment for the 1970-1971 school year was 12.4 percent higher than the total for the 1960-61 school year. However, the 1970s have seen a continued decline in the State's public school enrollments. The 269,380 students enrolled in the 1982-83 school year were 19 percent less than the total in 1970-71, but the average cost of education per student has more than tripled since 1970-71, reaching $2,690 in 1982-83.

In addition to the University of Nebraska with campuses in Lincoln and Omaha, post-secondary education in Nebraska consists of four State colleges, sixteen technical community college campuses and fifteen independent colleges and universities. In the five year period from 1977 to 1982 overall enrollment in these institutions increased by over 25 percent. The largest enrollment increase has occurred in the technical community colleges, which grew 32.4 percent. State colleges were up 16.9 percent, the University of Nebraska increased 6.9 percent and independent colleges and universities grew by 23.3 percent during this period. A substantial portion of this increase reflects a growing percentage of part-time students in higher education, particularly in the technical community colleges.

The statistics included in this section deal with the educational institutions in the State. Information on enrollment and financing public education was provided by the State Board of Education and the Nebraska Department of Education. Statistics presented on higher education were provided by the U.S. Department of Health, Education and Welfare, and the Nebraska Coordinating Commission for Postsecondary Education.

SECTION K

HEALTH AND WELFARE

In 1984 there were 113 licensed hospitals in Nebraska with 12,284 beds. These hospitals are located in 71 of the State's 93 counties. Those counties without hospitals tend to be sparsely populated: eight have populations of less than 1,000, and an additional four have less than 2,000 residents.

The leading cause of death in Nebraska in 1982 was heart disease. It caused almost twice the number of deaths as did the second leading cause, cancer. Together, heart disease and cancer caused over 58 percent of all deaths in the State during 1982.

Since 1970, welfare expenditures by Federal, State, and County governments have increased from $55 million to over $292 million in 1983. The 1983 total represents a 37 percent increase over 1980 expenditures and a 525 percent increase over 1970 costs. Maintenance payments are made to four special groups-- the aged, the blind, the disabled, and dependent children. Medical assistance is also provided for these groups and for others who do not receive maintenance payments.

The statistics included in this section present information about hospital facilities in the State, leading causes of death, and the State's public assistance programs. The sources of these data are the Nebraska State Department of Health and the Nebraska Department of Public Welfare.

SECTION L

GOVERNMENT

SECTION L

GOVERNMENT

As Nebraska's economy has grown, so has the ability to support a greater number of government services. In 1982, the general revenue available to the state of Nebraska totaled $ 1.56 billion. Education represents the largest expenditure item for both State and local budgets, totaling 19.9 percent of State government spending in 1982 followed by Public Welfare expenditures which amounted to 13.2 percent of state spending.

The largest source of State government general revenue is the sales and gross receipts tax, which yielded $491 million, or 31 percent of the total for 1982. Individual income tax, the second largest source, accounted for $226 million in revenues or 14.5 percent of the total. 1982 per capita revenue collected by State government in Nebraska was $548.11, which was 76 percent of the $720.02 average for all fifty states.

Local government subdivisions are most dependent on property taxes. In 1982, the latest year for which data is available, $821.9 million or 52.6 percent of all revenues came from this source.

Statistics in this section present information describing revenues and expenditures of State government, county totals for property and income taxes paid, and voter registration in the State and its counties. The chief sources of these data are the U.S. Bureau of the Census, the Office of the Nebraska Secretary of State, and the Nebraska Department of Revenue.

SECTION M

RECREATION AND TOURISM

Nebraska recreation and tourism grew rapidly for most of the 1970s and early 1980s, reflecting increases in population, leisure time, educational levels, automobile ownership, and disposable personal income. This growth was channeled into a number of activities, including visits to Nebraska park and recreation areas, historic facilities, and other attractions in the State.

In 1983, over 1.1 billion dollars was spent in Nebraska by visitors to the state as well as by residents on trips to places 100 miles or more from home. This spending accounted for the equivalent of 35,000 full-time jobs, making the Nebraska travel industry the state's third largest economic sector, following agriculture and manufacturing.

The growth of recreation and tourism is perhaps most evident in the increased use of Nebraska parks, historic sites, museums, and other attractions. Among the foremost of these attractions are the park and recreation areas of the Nebraska Game and Parks Commission, which together hosted well over 7 million visitors during 1983. These areas enable a variety of outdoor recreation activities, including sightseeing, picnicking, camping, swimming, boating, and fishing.

In this section, a listing is presented of Nebraska parks, recreation areas, and other attractions, including attendance figures for selected facilities. Also presented are data on outdoor recreation participation by Nebraskans as well as such indicators of Nebraska tourism as the origins and destinations of nonresident visitors to the State and a breakdown of their expenditures while in Nebraska.

PARK AND RECREATION AREAS

Nebraska 1983

Name	Location	Facilities
STATE PARKS		
Chadron	9 mi. S. Chadron, US-20 or -385	CFPBS

SECTION N

ENERGY

SECTION N

ENERGY

Energy consumption in Nebraska totaled 476 trillion Btu's during 1981. Petroleum accounted for the greatest usage--37 percent of the total, while natural gas ranked second with nearly 26 percent of the state's consumption. Slightly more than 36 percent was used for generating electricity, and 26 percent was attributable to the transportation sectors.

Since 1970, consumption of several types of energy has increased substantially. The consumption of coal, mostly to generate electricity, more than quadrupled between 1970 and 1981, and nuclear power, with the construction of two generating plants during the 1970s, accounted for approximately one-third of the electricity generated in Nebraska during 1981. On the other hand, natural gas consumption declined by almost 40 percent from 1970 to 1981, while hydroelectric generation decreased by 18 percent. The consumption of petroleum rose through the 1970s, and peaked in 1978, declining afterwards due largely to the 1979-82 recession and increased efficiency.

Nebraska is the only state in the nation where all electric utilities are publicly owned and operated. Costs to Nebraska's electrical consumers have been among the lowest in the entire United States. From 1970 to 1982, electric utility sales in Nebraska increased by approximately 84 percent, and generating capacity grew by 197 percent. Conventional steam sources, primarily coal, currently account for more than half of the state's electrical generating capacity.

Presented in this section are statistics dealing with energy generated and consumed in Nebraska. Data have been obtained largely from the following sources: the Nebraska Energy Office, the U.S. Department of Energy, the U.S. Bureau of the Census, the U.S. Bureau of Mines, the American Gas Association, and the Edison Electric Institute.

NATURAL GAS SALES OF UTILITIES AND CLASS OF SERVICE
